HSE-5J/EERB

Thor Power Tool Company
175 North State Street
Aurora, IL 60507

RE: Conservation Chemical Company
of Illinois, Inc. Site, Gary, Indiana
General Notice of Potential Liability

Dear Sir or Madam:

The United States Environmental Protection Agency (U.S. EPA) has documented the release or threat of release of hazardous substances, pollutants and contaminants into the environment from the above-referenced facility, and is planning to spend public funds to investigate and control these releases. This action will be taken by U.S. EPA pursuant to the Comprehensive Environmental Response, Compensation and Liability Act of 1980, 42 U.S.C. §9601 et seq. (CERCLA), as amended by the Superfund Amendments and Reauthorization Act of 1986, Pub. L. No. 99-499, 100 Stat. 1613 (1986) (SARA), unless U.S. EPA determines that such action will be done properly by a responsible party or parties. Responsible parties under CERCLA include the current and former owners and operators of the facility, persons who generated the hazardous substances, and persons who were involved in the transport, treatment or disposal of the hazardous substances at the facility. Under Section 107(a) of CERCLA, where U.S. EPA uses public funds towards the cleanup of the hazardous substances, responsible parties are liable for all costs associated with the removal or remedial action and all other necessary costs incurred in cleaning up the facility, including investigation, planning and enforcement costs.

U.S. EPA is currently planning to conduct the following actions at the above-referenced facility:

1. Develop and implement a site health and safety plan;
2. Establish site security and repair/replace the fence surrounding the site;

3. Identify, inventory, and characterize hazardous wastes on-site, including, but not limited to those in drums, tanks, and other containers on-site, and contaminated soils on-site.
4. Separate and stage drums, tanks and other containers found on-site into appropriate waste streams for disposal;
5. Dispose of all hazardous waste streams at a Resource Conservation and Recovery Act (RCRA)/Toxic Substances Control Act (TSCA) compliant facility which meets the CERCLA Off-Site Rule;
6. Decontaminate and cut-up all of the tanks on-site that once contained hazardous substances;
7. Dispose of or scrap-out the cut-up tanks.
8. Install an interceptor trench (lined on one side with a geotextile liner) on the southeast-side of the site for the collection of contaminated groundwater;
9. Install two oil skimmers and associated support equipment to recover the floating chemical layer from the interceptor trench;
10. Collect the excavated contaminated soil from the trench for appropriate treatment and/or disposal;
11. Conduct an Engineering Evaluation/Cost Analysis (EE/CA) for groundwater contamination at the site.

U.S. EPA has received information that your organization may have owned or operated the facility or generated or transported hazardous substances that were disposed of at the facility. By this letter, U.S. EPA notifies you of your potential liability with regard to this matter and encourages you, as a potentially responsible party, to agree to reimburse U.S. EPA for costs incurred to date and to voluntarily perform or finance the response activities which U.S. EPA has determined or will determine are required at the facility. Because of the conditions described above, U.S. EPA believes that response activities at the site must be initiated as quickly as possible. Therefore, U.S. EPA does not intend to utilize the special notice

procedures available under Section 122(e) of CERCLA, and, instead, is sending you this general notice letter.

U.S. EPA is willing to discuss with you the entry of an appropriate administrative consent order under which you would perform or finance response activities and reimburse U.S. EPA for its costs. If, however, a consent order cannot be concluded within a reasonable amount of time, U.S. EPA may issue a unilateral order under Section 106 of CERCLA, requiring you to perform specified work. Under Sections 106 and 107 of CERCLA, you may be liable for reimbursement of U.S. EPA's costs, for statutory penalties, and for treble damages for noncompliance with such an order.

As a potentially responsible party, you should notify U.S. EPA in writing within ten (10) days of receipt of this letter of your willingness to perform or finance the activities described above and to reimburse U.S. EPA for its costs. Your response should be sent to:

Linda Beasley
Enforcement Specialist
U.S. EPA - Region V
Emergency Support Section HSE-5J
77 West Jackson Boulevard
Chicago, Illinois 60604

Your response should indicate the appropriate name, address and telephone number for further contact with you. If you are already involved in discussions with State or local authorities or involved in a lawsuit regarding this facility, you may continue such activities as you see fit. This letter is not intended to advise you or direct you presently to restrict or discontinue any such activities already underway; however, you are advised to report the status of those discussions or actions in your response to this letter and to provide a copy of your response to any other parties involved in those discussions or actions.

If U.S. EPA does not receive a timely response, U.S. EPA will assume that your organization does not wish to negotiate a resolution of its potential responsibility in connection with the facility and that your organization has declined any involvement in performing the response activities. Due to the nature of the problem at this facility and the attendant legal ramifications, however, U.S. EPA strongly encourages you to submit a written response within the time frame specified herein.

A "kick-off" meeting for the CCCI Site has been scheduled for Thursday, November 10, 1994 at 10:30 a.m. The location of this meeting is the (Ramada) Congress Hotel, 520 South Michigan Avenue, Chicago, Illinois, 60605. At the meeting, U.S. EPA will

discuss the cleanup work that must be done at the site, legal options for facilitating the work at the site, U.S. EPA's recovery of past costs, and other issues related to the removal action. Please note that the meeting room has been reserved for the entire day of November 10, 1994. Therefore, once the meeting with the Agency has concluded, the potentially responsible parties will be free to use the room to meet with each other, outside of the presence of the Agency, to discuss any issues and concerns relating to this matter. For your information, a copy of the generator ranking summary report and waste type list for the CCCI Site are enclosed.

If you need further information regarding this letter, you may contact Cynthia N. Kawakami of the U.S. EPA Office of Regional Counsel at (312) 886-0564.

Sincerely yours,

A handwritten signature in cursive script, reading "Richard C. Karl".

Richard C. Karl, Chief
Emergency & Enforcement Response Branch
